

For Public Area Hygiene and  
Odor Control

ReliOx™ Corporation introduces the **Whiff!™ System** as the world's first and only on-demand delivery and dispensing system for aqueous chlorine dioxide for use in heavy use public areas, such as fitness centers, hotel rooms, lobbies, restaurants, auditoriums, offices and other public venues. Chlorine dioxide is known world-wide as a premium deodorizer which removes the world's toughest odors making spaces hygienically clean and odor free. Because chlorine dioxide is so highly reactive, it is critical to produce it just before it is needed. It is also critical that it is made to exact standards for use when and where you need it. The **Whiff!™ System** creates fresh and powerful pH neutral chlorine dioxide using a safe and patented reduction reaction and dispenses directly into the ReliOx™ High Performance Cold Fogger (included). Now you can quickly remediate large surfaces, seats, tables, carpets and floors with the safest and most effective product ever available.

Use of the system is as easy as ABC with each component clearly marked and sealed to ensure no user interference. Safety is assured and controlled as the **Whiff!™ System** is engineered to dispense a solution concentration specific for use in public spaces. Plug the components together and start Whiffing!.

The **Whiff!™ System** adheres to Green Chemistry principles and all its components are recyclable or reusable. **Whiff!™ System** is the smart product to choose for all your hygiene and odor problems.

Part A passes through Part B which  
creates Part C

All three are non-toxic and safe

## Whiff!™ System

- Most complete environmental hygiene system available today.
- Compatible with all surfaces.
- Leaves behind no odor.
- No persistent or destructive-by-products (DBP's)
- Fast application and fast acting and an environmentally safe product.
- High powered deep penetrating cold fogger for maximum coverage.
- Heating and air condition hygienic cleaning with forced product circulation.
- Simple and fun to use.

### Health and Safety

Based on available information, this product is not expected to produce adverse effects on health when used for the intended application and the recommendations provided in the Safety Data Sheet (SDS) are followed. SDS's are available via the internet. This product should not be used for purposes other than its intended use. If disposing of used product, take care to protect the environment.
